

Dell Latitude D600 (331GL)

Laptop & Data/Video Project Use: connect the VGA cable into the "video connector" port

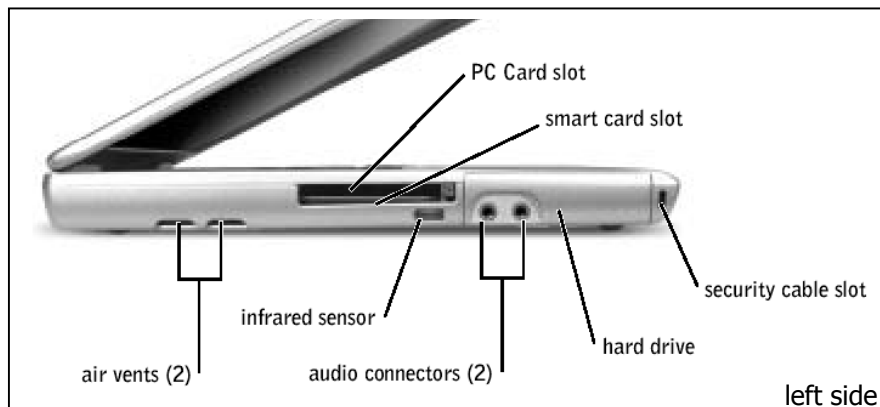

If projecting sound from the computer: plug the audio cord (available with the projector) into the right "audio connector" port (with the headphone icon) on the left side of the laptop.

Switching the Video Image

When you start the computer with an external device (such as an external monitor or projector) attached and turned on, the image may appear on either the display or the external device.

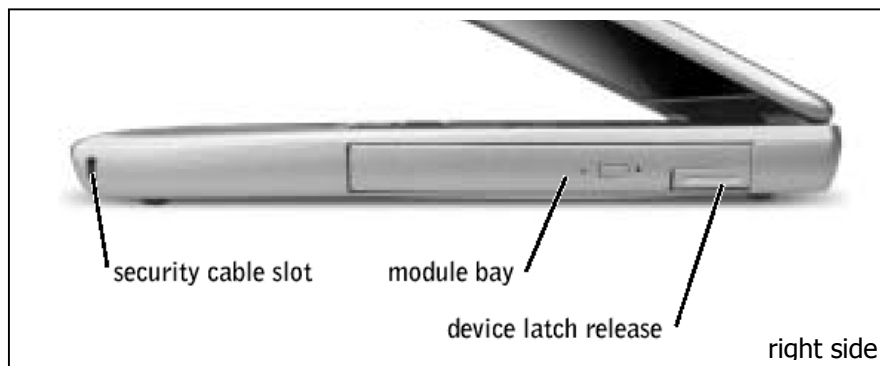

Press **Fn** **F8** **CRT/LCD** to switch the video image to the integrated display only, the integrated display and an external device (ie. Data/Video projector) simultaneously or an external device only.

Software Use & Installation:

You may load your own software and files onto the laptop – they will be erased upon check-in. Please consult the equipment specification sheet for a list of software available on this machine. Note that some applications are only accessible when connected to the Cal Poly network via ethernet or the Imagine modem pool.

To use the supplied floppy drive: you may either connect it externally with the supplied USB cable (into the "USB connector" port) or remove the installed DVD/CdRw drive by pushing in and pulling out the module bay using the device latch release **while the computer is off** and replacing it with the floppy drive.
